Art Unit: 2816

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

2. The disclosure is objected to because of the following informalities: there are numerous grammatical errors throughout the specification which should be corrected in response to this office action.

3. The drawings are objected to because no capacitor is seen in instant Fig. 3, although it is referred to in the specification at page 4 [para 0028]. Also, Fig. 4 is incorrect in that the input to amplifier 430 should be "Vcomp" (not Vmo), see the specification at page 10 [para 0069]. Moreover, "Vcomp" needs to be labelled in instant Fig. 1. Finally, it is not clear where in Fig. 1 the "amplifying means" is (referred to at page 5 [para 0031, line 6]).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be

Art Unit: 2816

labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is incorrect to recite that the control signal supply circuit "outputs" a first voltage, i.e., this should be changed to recite that the control signal supply circuit "generates" a first voltage (because the first voltage is Vcomp, which is clearly not output from circuit 200 in

Art Unit: 2816

instant Fig. 1). The term "outputs" on line 6 also appears to be incorrect (if the second voltage is  $V_{nc}$  or  $V_a$  in instant Fig. 1). Further in claim 1, it appears that lines 6-7 are incorrect as well, because the third voltage ( $V_{mo}$ ) is generated by multiplying  $V_{comp}$  by  $V_a$ , not by multiplying  $V_{comp}$  by a predetermined gain.

Independent claim 14 is seen to have the same indefiniteness problems as noted above with regard to claim 1.

5. Claims 1-21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.
